

## AMAMCO Tool Company Profile

- A custom solutions service company, manufacturing end user-designed and application-specific tools for industries including aerospace, automotive, marine, medical and diverse applications.
- A tool developer that proves a tool from prototype through testing and into production.
- A toolmaker of the specific application & machine operator – allowing our customers to **run** cutting machines faster and for longer shifts.
- Rotary cutting tools made of tested & highest quality solid carbide that meets the demands of high-tolerance applications.
- Maker of tools certified for ‘on the shelf’ usability’ – not a maker of ‘off-the-shelf’ or a ‘one tool fits all’ line of catalogue items.
- Toolmakers who work with the customer until the desired result is achieved.

Service / manufacturer for companies around the world who depend on AMAMCO Tool in the design and testing phase as well as when the tool is ready to be produced in full production quantities.
